Data Presentation

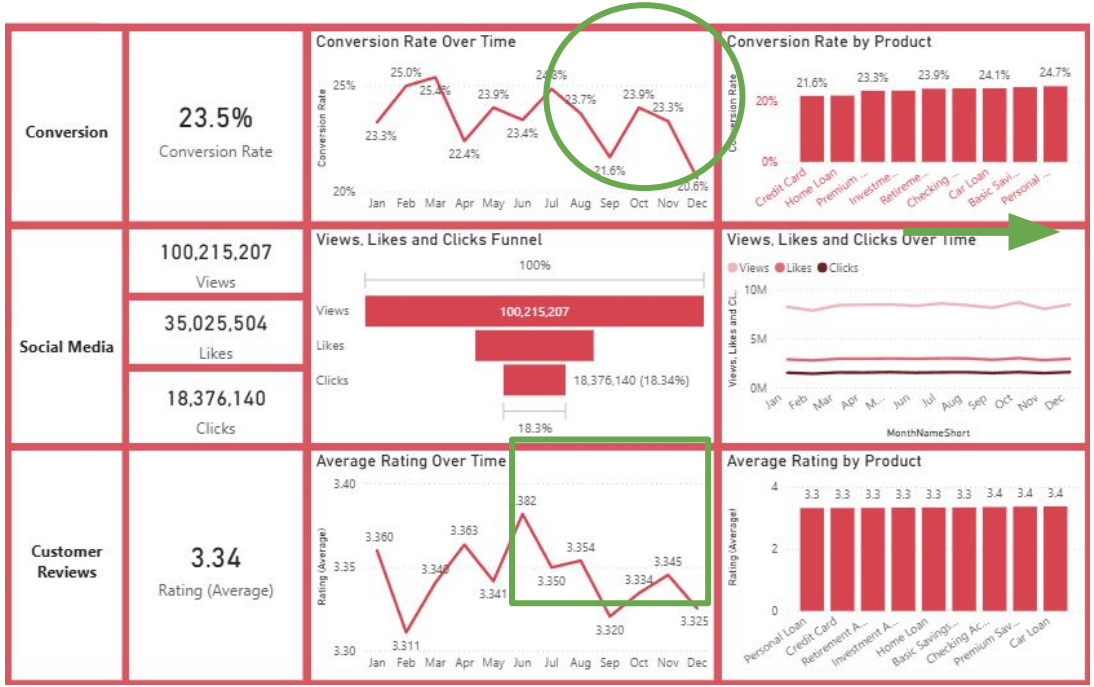
By Jaheem Edwards

Overview

- **Decreased Conversion Rate:** The conversion rate has fluctuated throughout the year, notably it went from 23.9% in October to 20.6% in December.

- **Stable Customer Engagement:**
  - The social media engagement was stable throughout the year with views being the highest.
  - While clicks and likes are lower compared to views, the click-through rate stands at 18.34 %, meaning that engaged users are still interacting effectively.

- **Customer Feedback Analysis:**
  - Customer ratings have remained consistent, averaging around 3.34 throughout the year.
  - Although stable, the average rating is below the target of 4.0, suggesting a need for focussed improvements in customer satisfaction,



Conversion Rate

- **General Conversion Trend:**
  - Throughout the year, conversion rates varied, with higher numbers of products converting successfully in months like January and May. This suggests that while some products had strong seasonal peaks, there is potential to improve conversions in lower-performing months through targeted interventions.
- **Lowest Conversion Month:**
  - December experienced the lowest overall conversion rate at 20.6%, with personal loans standing out significantly in terms of conversion. This indicates the potential need to revisit marketing strategies or promotions during this period to boost performance.
- **Highest Conversion Month:**
  - March recorded the highest conversion rate at 25.4%, driven significantly by basic savings accounts with a remarkable 33.3% conversion. This indicates a strong Q1, likely fueled by seasonal demand and effective marketing strategies.

Product Name	Jan	Feb	Mar	Apr	May	Jun	Jul	Aug	Sep	Oct	Nov	Dec	Total

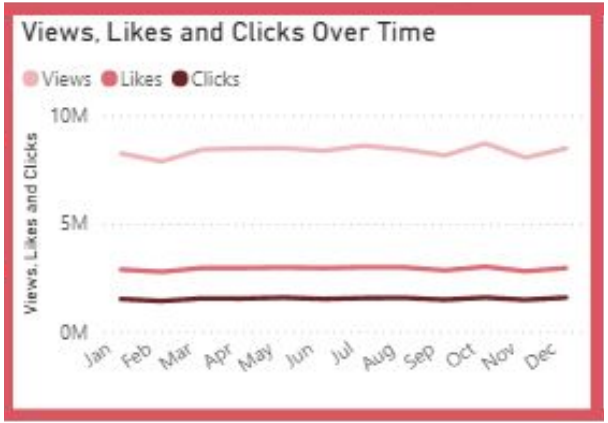
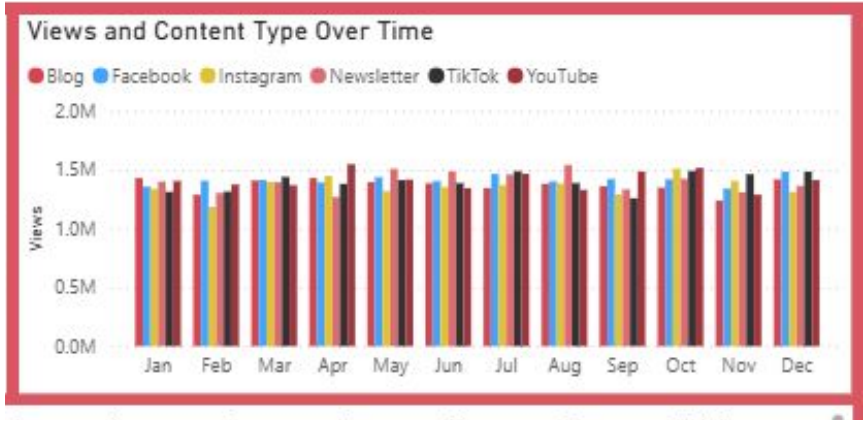
Stable Customer Engagement

- **Stable Views:**
  - Views were consistent throughout the year and hitting its peak in November

- **Low Interaction Rates:**
  - Clicks and likes remained consistently low compared to views, suggesting the need for more engaging content or stronger calls to action.

- **Content Type Performance:**
  - TikTok and youtube drove the most views, especially in April and October, while the others channels were stable and high.





Customer Feedback Analysis

- **Customer Ratings Distribution:**
  - The majority of the customer reviews are in the mid to higher ratings, with 7,412 reviews at 4 stars and 6,240 reviews at 3 stars, indicating overall satisfaction. Lower ratings (1-2 stars) account for a smaller portion, with 3,763 reviews at 2 stars and 2,502 at 1 star.

- **Sentiment Analysis:**
  - Positive sentiment dominates with 12,366 reviews, reflecting a generally satisfied customer base. Negative sentiment is present in 5,633 reviews, with a smaller number of mixed and neutral sentiments, suggesting some areas for improvement but overall strong customer approval.

- **Opportunity for Improvement:**
  - The presence of mixed positive and mixed negative sentiments suggests that there are opportunities to convert those mixed experiences into more clearly positive ones, potentially boosting overall ratings. Addressing the specific concerns in mixed reviews could elevate customer satisfaction.

Goals and Actions

Goals

- **Increase Conversion Rates:**
  - **Goal:** Identify factors impacting the conversion rate and provide recommendations to improve it.
  - **Insight:** Highlight key stages where visitors drop off and suggest improvements to optimize the conversion funnel.
- **Enhance Customers Engagement:**
  - **Goal:** Determine which types of content drive the highest engagement.
  - **Insight:** Analyze interaction levels with different types of marketing content to inform better content strategies.
- **Improve Customer Feedback Scores**
  - **Goal:** Understand common themes in customer reviews and provide actionable insights.
  - **Insight:** Identify recurring positive and negative feedback to guide product and service improvements.

Actions

- **Increase Conversion Rates:**
  - Target High-Performing Product Categories: Focus marketing efforts on products with demonstrated high conversion rates, such as Personal Loans and Basic Savings Accounts. Implement seasonal promotions or personalized campaigns during peak months (e.g. February and March) to capitalize on these trends.
- **Enhance Customers Engagement:**
  - Revitalize Content Strategy: To turn around declining views and low interaction rates, experiment with more engaging content formats, such as interactive videos or user-generated content. Additionally, boosting engagement by optimizing call-to-action placement in social media and blog content, particularly during historically lower-engagement months (January- March)
- **Improve Customer Feedback Scores**
  - Address Mixed and Negative Feedback: Implement a feedback loop where mixed and negative reviews are analyzed to identify common issues. Develop improvement plans to address these concerns. Consider following up with dissatisfied customers to resolve issues and encourage re-rating, aiming to move average ratings closer to the 4.0 target.
